AGIP ARUM HT 220

AGIP **ARUM HT 220** is a superior quality lubricant formulated from special ester-type synthetic bases which leave no deposits at high temperatures. It is additive-treated to impart antiwear properties and exceptional oxidation resistance.

CHARACTERISTICS (TYPICAL FIGURES)

AGIP ARUM HT 220

Viscosity at 40°C	mm²/s	222
Viscosity at 100°C	mm²/s	25
Viscosity Index	-	143
Flash Point COC	°C	244
Pour Point	°C	-30
Mass density at 15°C	kg/l	0,981

PROPERTIES AND PERFORMANCE

- Thanks to its special base, AGIP ARUM HT 220 minimizes high-temperature carbon deposits.
- The product's high Viscosity Index reduces the variation of viscosity with temperature, thus assuring an adequate lubricant film at all times.
- The product's antirust properties ensure effective protection of all lubricated parts.
- The good antiwear properties of AGIP **ARUM HT 220** prolong the life of lubricated components even at high temperatures.
- The oxidation resistance of AGIP **ARUM HT 220** prolongs the service life of the oil, thus guaranteeing the best lubricating conditions.

APPLICATIONS

AGIP **ARUM HT 220** is expressly recommended for the lubrication of chains, bearings and gears operating at high temperatures. AGIP **ARUM HT 220** can be applied by automatic sprays or drip oilers. It can also be brushed on by hand.

N.B.: This product is miscible at ambient temperature with mineral oils. It is not miscible with polyglycols such as, for instance, BLASIA S and similar products.
