SAFETY DATA SHEET

HUNTSMAN

ARALDITE® 2011 GB RESIN

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier	
Product name	: ARALDITE® 2011 GB RESIN
Product code	: 00074041
Product description	4 (A)
1.2 Relevant identified uses	of the substance or mixture and uses advised against
Product use	: Component for adhesive applications
1.3 Details of the supplier of	the safety data sheet
Supplier	: Huntsman Advanced Materials (Europe)BVBA Everslaan 45 3078 Everberg / Belgium Tel.: +41 61 299 20 41 Fax: +41 61 299 20 40
e-mail address of person responsible for this SDS	: Global_Product_EHS_AdMat@huntsman.com
1.4 Emergency telephone nu	Imber
<u>Supplier</u>	
Telephone number	: EUROPE: +32 35 75 1234 France ORFILA: +33(0)145425959 ASIA: +65 6336-6011 China: +86 20 39377888 India: +91 22 4050 6333 Australia: 1800 786 152 New Zealand: 0800 767 437 USA: +1/800/424.9300

SECTION 2: Hazards identification

2.1 Classification of the sub	stance or mixture					
Product definition	: Mixture					
Classification according to	Regulation (EC) No. 1272/2008 [CLP/GHS]					
Skin Irrit. 2, H315						
Eye Irrit. 2, H319 Skin Sens. 1, H317						
Aquatic Chronic 2, H411						
•	Directive 1999/45/EC [DPD]					
The product is classified as	dangerous according to Directive 1999/45/EC and its amendments.					
Classification	: Xi; R36/38					
	R43					
	N; R51/53					
Human health hazards	: Irritating to eyes and skin. May cause sensitisation by skin contact.					
Environmental hazards	: Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.					
See Section 16 for the full te	xt of the R phrases or H statements declared above.					

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements

Date of issue / Date of revision : 9/7/2012.

ARALDITE 2011 GB RESIN						2/16
Date of printing	:	7 September 2012	MSDS no.	:	00074041	
Date of issue	:	7 September 2012	Version	:	1	
SECTION 2: Hazards	s io	dentification				
Hazard pictograms	:	!	>			
Signal word	:	Warning				
Hazard statements	:	: Causes skin irritation. Causes serious eye irritation. May cause an allergic skin reaction. Toxic to aquatic life with long lasting effects.				
Precautionary statements						
General	:	Not applicable.				
Prevention	:		: >8 hours (breakthrough L). Wear eye or face prot			
Response	:		utiously with water for seve easy to do. Continue rinsin		Remove contact	
Storage	:	Not applicable.				
Disposal	:	Not applicable.				
Hazardous ingredients	:	reaction product: bisph molecular weight < 700	enol A-(epichlorhydrin); er))	boxy resin (nu	umber average	
Supplemental label elements	:	Not applicable.				
Supplemental label elements	:	Contains epoxy constit	uents. See information su	pplied by the	manufacturer.	
Special packaging requirer	<u>ner</u>	<u>nts</u>				
Containers to be fitted with child-resistant fastenings	:	Not applicable.				
Tactile warning of danger	:	Not applicable.				
2.3 Other hazards						
Other hazards which do not result in classification	:	Not available.				

Conforms to Regulatio	n (EC) No. 1907/2006 (REACH),	Annex II - United Kingdor	m (UK)
ARALDITE 2011 GB R	ESIN		3/16
Date of printing	: 7 September 2012	MSDS no.	: 00074041
Date of issue	: 7 September 2012	Version	: 1

SECTION 3: Composition/information on ingredients

			Class	<u>ification</u>	
Product/ingredient name	Identifiers	%	67/548/EEC	Regulation (EC) No. 1272/2008 [CLP]	Туре
reaction product: bisphenol A- (epichlorhydrin); epoxy resin (number average molecular weight < 700)	CAS: 25068-38-6 EC: 500-033-5 RRN: 01-2119456619- 26	60-100	Xi; R36/38 R43 N; R51/53	Skin Irrit. 2, H315 Eye Irrit. 2, H319 Skin Sens. 1, H317 Aquatic Chronic 2, H411	[1]
bisphenol F-epoxy resin	CAS: 9003-36-5 EC: 500-006-8 RRN: 01-2119454392- 40	7-13	Xi; R38 R43 N; R51/53	Skin Irrit. 2, H315 Skin Sens. 1, H317 Aquatic Chronic 2, H411	[1]
bisphenol A - epoxy resins, number average MW >700 - <1100	CAS: 25068-38-6	3-7	Xi; R36/38 R43	Skin Irrit. 2, H315 Eye Irrit. 2, H319 Skin Sens. 1, H317	[1]
			See Section 16 for the full text of the R- phrases declared above.	See Section 16 for the full text of the H statements declared above.	

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

SECTION 4: First aid measures

4.1 Description of first ai	d measures
Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Skin contact	: Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

ARALDITE 2011 GB RESIN			4/16	
Date of printing	: 7 September 2012	MSDS no.	: 00074041	
Date of issue	: 7 September 2012	Version	: 1	
SECTION 4: First aid	d measures			
Protection of first-aiders	may be dangerous	aken involving any personal ris to the person providing aid to d clothing thoroughly with wate	sk or without suitable training. It give mouth-to-mouth resuscitation. er before removing it, or wear	
4.2 Most important symptor		ute and delayed		
Potential acute health effe				
Eye contact	: Causes serious eye			
Inhalation	: No known significant effects or critical hazards.			
Skin contact		Causes skin irritation. May cause an allergic skin reaction.		
Ingestion	: Irritating to mouth, t	: Irritating to mouth, throat and stomach.		
Over-exposure signs/sym	<u>ptoms</u>			
Eye contact	: Adverse symptoms pain or irritation watering redness	s may include the following:		
Inhalation	: No specific data.			
Skin contact	: Adverse symptoms irritation redness	s may include the following:		
Ingestion	: No specific data.			
4.3 Indication of any immed		· · · · · · · · · · · · · · · · · · ·		
Notes to physician	quantities have bee	en ingested or inhaled.	t specialist immediately if large	
Specific treatments		nent and supportive therapy as nt should be kept under medic		

SECTION 5: Firefighting measures

5.1 Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.
5.2 Special hazards arising f	rom the substance or mixture
Hazards from the substance or mixture	: In a fire or if heated, a pressure increase will occur and the container may burst. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide halogenated compounds metal oxide/oxides
5.3 Advice for firefighters	
Special precautions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Date of printing	: 7 September 2012 : 7 September 2012	Version	· 1	
ARALDITE 2011 GB R	ESIN : 7 September 2012	MSDS no.	: 00074041	5/1

SECTION 5: Firefighting measures

SECTION 5. Thengin	ing measures
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1 Personal precautions, pro	ote	ctive equipment and emergency procedures
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.
6.3 Methods and materials for	r c	ontainment and cleaning up
Small spill	-	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	:	Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see section 1 for emergency contact information and section 13 for waste disposal.
6.4 Reference to other sections	:	See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1 Precautions for safe handling

Protective measures	: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
	Netenalische

Not applicable.

ARALDITE 2011 GB RESIN			6/10
Date of printing	: 7 September 2012	MSDS no.	: 00074041
Date of issue	: 7 September 2012	Version	: 1
SECTION 7: Handlin	g and storage		
Advice on general occupational hygiene	handled, stored and pro eating, drinking and sm	ocessed. Workers should oking. Remove contamin ing eating areas. See als	ed in areas where this material is I wash hands and face before hated clothing and protective so Section 8 for additional
7.2 Conditions for safe storage, including any incompatibilities	accordance with local r sunlight in a dry, cool a (see section 10) and fo ready for use. Contain kept upright to prevent	egulations. Store in origin nd well-ventilated area, av od and drink. Keep conta ers that have been opened	0°C (35.6 to 104°F). Store in hal container protected from direct way from incompatible materials iner tightly closed and sealed until d must be carefully resealed and unlabelled containers. Use contamination.
Storage hazard class Huntsman Advanced Materials	: Storage class 10, Envir	onmentally hazardous liqu	uids
7.3 Specific end use(s)			
Recommendations	: Not available.		
Industrial sector specific solutions	: Not available.		
SECTION 8: Exposu	re controls/person	al protection	
The information in this section consulted for any available us			ntified Uses in Section 1 should be ario(s).
8.1 Control parameters			
Occupational exposure lim	<u>lits</u>		
No exposure limit value kno	wn.		
Recommended monitoring procedures	atmosphere or biologic of the ventilation or oth protective equipment. methods for the assess	al monitoring may be requ er control measures and/c Reference should be mad ment of exposure by inha	e limits, personal, workplace hired to determine the effectiveness or the necessity to use respiratory le to European Standard EN 689 for hation to chemical agents and e determination of hazardous
Derived effect levels No DELs available.			
Predicted effect concentra	tions		

8.2 Exposure controls

Appropriate engineering controls

gineering : No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Individual protection measures

SECTION 8: Exp	oosure controls/person	al protection	
Date of issue	: 7 September 2012	Version	: 1
Date of printing	: 7 September 2012	MSDS no.	: 00074041
ARALDITE 2011 GB R	ESIN		7/
Conforms to Regulation	on (EC) No. 1907/2006 (REACH),	Annex II - United Kingdo	m (UK)

Hygiene measures		Wash hands, forearms and face thoroughly after handling chemical products, befor
nygiene measures		eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	-	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.
Skin protection		
Hand protection	:	Chemical-resistant, impervious gloves complying with an approved standard shoul be worn at all times when handling chemical products if a risk assessment indicate this is necessary.
Material of gloves for long term application (BTT>480min):	:	butyl rubber, Ethyl Vinyl Alcohol Laminate (EVAL)
Material of gloves for short term/splash application (10min <btt<480min):< td=""><td>:</td><td>nitrile rubber, neoprene</td></btt<480min):<>	:	nitrile rubber, neoprene
(BTT = Break Through Time)		
		Use gloves approved to relevant standards e.g. EN 374 (Europe), F739 (US). Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material and dexterity. Always se advice from glove suppliers. Additional information can be found for instance at www.gisbau.de.
Body protection	:	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	:	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	:	In case of inadequate ventilation wear respiratory protection. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
Environmental exposure controls	:	Emissions from ventilation or work process equipment should be checked to ensu they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and chemical properties

SECTION 12: Ecological information

Soil/water partition coefficient (Koc)	: Not available.
Mobility	: Not available.

12.5 Results of PBT and vPvB assessment

Not applicable.

12.6 Other adverse effects : No known significant effects or critical hazards.

12.7 Other ecological information

SECTION 13: Disposal considerations

: Yes.

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods

Product

Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.
---------------------	---

Hazardous waste

European waste catalogue (EWC)

Waste code	Waste designation		
07 02 08*	other still bottoms and reaction residues		
Packaging	•		
Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.		
Special precautions	: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

SECTION 2: Hazards identification

2.1 Classification of the su	ubstance or mixture
Product definition	: Mixture
Classification according Skin Corr. 1C, H314 Eye Dam. 1, H318 Skin Sens. 1, H317	to Regulation (EC) No. 1272/2008 [CLP/GHS]
Ingredients of unknown toxicity	:
Ingredients of unknown ecotoxicity	:
Classification according	to Directive 1999/45/EC [DPD]

ARALDITE 2011 GB H	ARDENER			2/19
Date of printing	: 3 June 2014	(M)SDS no.	: 00074042	
Date of issue	: 3 June 2014	Version	: 3	

SECTION 2: Hazards identification

The product is classified as dangerous according to Directive 1999/45/EC and its amendments.

Classification	: C; R34
	R43
Human health hazards	: Causes
Additional information	: Accordir

- s : Causes burns. May cause sensitisation by skin contact.
 - : According to Directive 99/45/EC, Article 6, Paragraph 1b, classification derived from direct toxicological testing of the preparation take precedence over classification derived from using the conventional (calculation) method.

See Section 16 for the full text of the R phrases or H statements declared above. See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements		
Hazard pictograms	:	
Signal word	:	Danger
Hazard statements	:	Causes severe skin burns and eye damage. May cause an allergic skin reaction.
Precautionary statements		
General	:	Not applicable.
Prevention	1	Wear protective gloves: > 8 hours (breakthrough time): butyl rubber, Ethyl Vinyl Alcohol Laminate (EVAL). Wear eye or face protection. Wear protective clothing.
Response	:	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or physician. IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. Immediately call a POISON CENTER or physician. IF IN EYES: Immediately call a POISON CENTER or physician.
Storage	:	Store locked up.
Disposal	:	Dispose of contents and container in accordance with all local, regional, national and international regulations.
Hazardous ingredients	:	N'-(3-Aminopropyl)-N,N-dimethylpropane-1,3-diamine Amines, polyethylenepoly-, triethylenetetramine fraction
Supplemental label elements	:	Not applicable.
Special packaging requirem	ien	<u>ts</u>
Containers to be fitted with child-resistant fastenings	:	Not applicable.
Tactile warning of danger	:	Not applicable.
2.3 Other hazards		
Other hazards which do not result in classification	:	None known.

SECTION 4: First aid measures

4.1 Description of first aid measures

Eye contact	: Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.
Inhalation	: Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

4.2 Most important symptoms and effects, both acute and delayed

	m de la constante and delayed
Potential acute health	effects
Eye contact	: Causes serious eye damage.
Inhalation	 May give off gas, vapor or dust that is very irritating or corrosive to the respiratory system. Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.
Skin contact	: Causes severe burns. May cause an allergic skin reaction.
Ingestion	: May cause burns to mouth, throat and stomach.
<u>Over-exposure signs/s</u>	<u>ymptoms</u>
Eye contact	: Adverse symptoms may include the following: pain watering redness
Inhalation	: No specific data.
Skin contact	: Adverse symptoms may include the following: pain or irritation redness blistering may occur
Ingestion	: Adverse symptoms may include the following: stomach pains
4.3 Indication of any imm	nediate medical attention and special treatment needed
Notes to physician	 In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments	: Symptomatic treatment and supportive therapy as indicated. Following severe exposure the patient should be kept under medical review for at least 48 hours.

Date of issue	:	3 June 2014	Version	: 3	
SECTION 5: Firefigh	tin	g measures			
5.1 Extinguishing media					
Suitable extinguishing media	:	Use an extinguish	ing agent suitable for the surrou	unding fire.	
Unsuitable extinguishing media	:	None known.			
5.2 Special hazards arising f	ron	n the substance o	r mixture		
Hazards from the substance or mixture	1	In a fire or if heate	d, a pressure increase will occu	ur and the container may burs	t.
Hazardous thermal decomposition products	:	Decomposition pro carbon dioxide Carbon monoxide nitrogen oxides	oducts may include the following	g materials:	
5.3 Advice for firefighters					
Special precautions for fire-fighters	:		ne scene by removing all person action shall be taken involving a		lent if
Special protective equipment for fire-fighters	:	breathing apparat mode. Clothing for	ld wear appropriate protective edus (SCBA) with a full face-piece or fire-fighters (including helmets opean standard EN 469 will prot	operated in positive pressure s, protective boots and gloves)
SECTION 6: Acciden	nta	l release mea	asures		

6.1 Personal precautions, pro	tective equipment and emergency procedures
For non-emergency personnel	: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Do not breathe vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
6.3 Methods and materials for	containment and cleaning up
Small spill	: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	: Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product.

Conforms to Regulatio	n (EC) No. 1907/2006 (REACI	H), Annex II - United Kingdon	n (UK)	
ARALDITE 2011 GB H	ARDENER		6	6/19

Date of issue	: 3 June 2014	Version	: 3	
SECTION 6: Acc	idental release meas	sures		

SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1 Precautions for safe handling

Protective measures	: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
7.2 Conditions for safe storage, including any incompatibilities	: Store between the following temperatures: 2 to 40°C (35.6 to 104°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.
Storage hazard class Huntsman Advanced Materials	: Storage class 8, Corrosive substances
7.3 Specific end use(s)	
Recommendations	: Not available.
Industrial sector specific solutions	: Not available.

SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

8.1 Control parameters

Occupational exposure limits

No exposure limit value known.

Conforms to Regulatio	n (EC) No. 1907/2006 (REACH	i), Annex II - United Kingdon	1 (UK)	
ARALDITE 2011 GB H	ARDENER			7/19

SECTION 8: Exposure controls/personal protection

Recommended monitoring procedures : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods

Product Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Hazardous waste : Yes.
